

# Cartridge heater

Type 850 – without flange, without cap

Type 851 – with flange, without cap

Type 852 – with flange, with cap

## Typical Applications

Warming / heating of mainly liquid media (e.g. water, oil, chemical media) in all industrial sectors.

## Characteristics

- voltage up to 600V
- diameter up to 60mm
- length up to 3500mm
- tube / flange made of brass, steel or stainless steel
- with / without flange
- with / without cap (brass nickel-plated)
- cable gland axial
- protection class: I
- IP protection class: IP 55
- available with additional protection tube
- temperature control done by customer
- UL /CSA approval (E76225) for standard versions
- variations on request
